(\* Included with the annual maintenance fee)

# ClickLearn for SAP Solutions

## License Model

The ClickLearn Enterprise License is a perpetual license. A one-time investment followed by an annual maintenance fee of 20%. This license model is a fixed cost, with no hidden fees and no extra cost to scale your business with ClickLearn.

## Distribution Rights

With the ClickLearn Enterprise License you have unlimited and unrestricted internal distribution rights of your produced learning material within the corporate group. There is no limit on the amount of users or number of processes documented.

## Connectors

A connector is a technical term for the integration ClickLearn has with the underlying business system. It means that ClickLearn understands the application, all data, customizations and extensions within the system. The connector enables ClickLearn's Replay technology, ClickLearn Assist and ClickLearn InsideHelp to deliver e-learning inside the business system.

## Authors

An Author is the person who works with ClickLearn to create materials. The Author records processes, produces and publishes the produced material into the learning portal. Your Author(s) will be trained in all features and functionality of ClickLearn. The Author license is an un-named concurrent license, meaning you can have several people working with just one Author license. If you need several Authors working with ClickLearn at the same time, additional Author licenses can be added at any point.

## Maintenance

The annual maintenance fee of 20% covers several key services; free updates of ClickLearn to keep you running on the latest versions of your business software, free customer care services including training, free and unlimited priority support, free on-boarding of authors, free cloud services including hosting and translation, free consultancy services to help with branding, publishing and e-learning best practices.
